

Cyberbond – Who we are. What moves us.

We focus on the formulation, production and sale of innovative high-performance adhesives, as well as curing and filling systems. Cyberbond stands for - comprehensive, technology-orientated problem solving solutions. This is made possible, because of the wide experience and knowledge of our staff in this special field and the excellent equipment of our research laboratories and production areas, as well as an effective quality management, which is the core of our corporate policy.

The company has committed itself to the stakeholder principle, which as everyone knows, aims to achieve harmonization of the entire environment of a company, such as customers, suppliers, employees, shareholders, neighbourhood, the public and environment.

Our customers are our partners

The basis of each customer relationship is partnership, honesty and respect. It is our obligation to recognize our customers' demands at an early stage and to offer optimal adhesive solutions. Customer satisfaction is our priority: Prompt response to enquiries and quick adaptation of our products to individual customer requirements are our strong qualities.

We want to grow

Our ideas and our knowledge create new products and secure our future. We want to solve the application problems of our customers and meet their requirements and expectations. We understand market changes as a chance for greater growth, in order to put our skills into the service of development and supply of innovative adhesive solutions to meet the emerging demands of our customers.

Our employees identify with our company

The qualification, information and motivation and therefore the satisfaction of all staff members is of great importance to us and is the fundamental requirement for the success of our company. Only in a good working team can one be strong and perform best. An open and honest communication, as well as ethically correct behaviour, is a matter of course. Our employees are regularly trained and developed in the necessary knowledge and skills required. They are incorporated into the Management System and take on responsibility for our mutual efforts for achieving quality objectives. Thus contributing to the continuous adaptation and improvement of the quality management system to new situations.

Quality

Striving for the so-called “zero defect quality” as well as the continuous improvement and further development of our certified quality assurance system, is regarded as everyone’s commitment in our company. Error prevention has priority over error correction. For us, quality means do everything right from the start and to continuously optimize our process. Every employee has the right and the obligation to ensure that circumstances preventing the manufacture of products of flawless quality or imposing unnecessary burden to the environment are eliminated. Our integrated management system meets all requirements of the standards ISO 9001, TS 16949, ISO 14001 and ISO 13485.

Environment

Protecting the environment is a fundamental part of our company policy and is the concern of all employees. Our key note of environmental responsibility is the prevention of hazards and the reduction of possible environmental impacts. The preventive assessment of environmental affects in all our corporate decisions is the central element of our environmental policy. We accept our responsibility to comply with all environment protection laws and regulations. Our objective is the continuous improvement of the operational environmental performance
